TDList(s)

Version 1.02 5/22/2026

The three TDList files have been implemented with new URLs. These are the files that tournament directors and others use to find an AGA ID, determine if a membership is up to date, see what chapter a member belongs to etc.

The URL's are all similar except for the final letter A, B, or N. The A and B files are tab separated. Their only difference is the A version shows the short code for a chapter if a member belongs to a chapter and the B version shows the chapter name instead. The N file has fixed length rather than tab-separated fields. The URLs, field names, and a few sample records for each are shown below.

The TDList's can also be found with a shortened redirect to these URLs from the AGA website, e.g. https:\\usgo.org\TDListA
